

# Govor tijela pasa: strah i tjeskoba

Govor tijela i signale koje nam šalje pas moramo uvijek promatrati u kontekstu cijele situacije.

Nije svako zijevanje rezultat stresa niti je svako odbijanje hrane rezultat tjeskobe.

Promatrajte ponašanje svojeg ljubimca u različitim situacijama: naučite njegov jezik!

Zgureni, skupljeni položaj tijela, 'zategnute' usne, široke zjenice, povijeni rep, ne želi prići blizu

## Suptilniji znakovi straha i tjeskobe

Učestalo oblizivanje iako nema hrane u blizini

Uznemireno, ubrzano dahtanje iako pas nije žedan i nije vruće

Namršteno čelo, uši postrance ili priljubljene uz glavu

Kreće se polako i ukočeno

Zijevanje iako nije umoran

Pretjerana obazrivost, pozornost

Odbija hranu ili poslasticu bez očitog razloga

Odmiče se od ponuđene hrane

Nervozno kretanje, ne može se smiriti
